

Customize Unified Care With This Optional Service

Preventive Maintenance

for Audio Visual Systems installed by Unified AV Systems (UAVS)

Keeping your system properly maintained is essential for getting the most out of your technology.

This preventive maintenance agreement includes the following features:

- Annual preventive maintenance visits
- Detailed performance report as needed

During our preventive maintenance visits, UAVS will inspect your system, test and validate all system functionality to confirm total system operational capability, check all cables and connectors, fine tune and adjust your equipment to manufacturers' specifications, including applicable software and firmware upgrades. UAVS will provide a preventive maintenance report, reviewing any deficiencies with you and recommend and/or arrange corrective action. Our preventive maintenance visits will help assure that your system continues to work dependably, now and in the future.

This optional service can be added to the Unified Care Service Plan with the required/desired interval of Preventive Maintenance visits as is appropriate to the facility, system, and customer environment. Our Service Department can develop a customized solution to meet your specific needs and include this in an updated proposal.
